

# Which is your favorite type of lightbulb and why?

incandescent

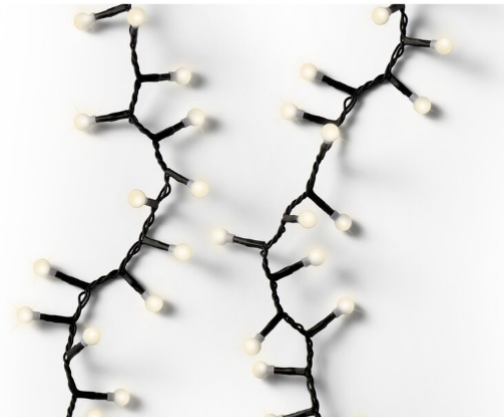

flourescent (CFL)

edison bulb

LED

twinkle lights

blacklight

# Can you match the questions and answers?

**Q: How many programmers does it take to change a light bulb?**

**A: Two. One to change it and one to change it back again.**

**a**

**Q: How many surrealists does it take to change a lightbulb?**

**A: Toucan do it.**

**b**

**Q: How many bureaucrats does it take to change a lightbulb?**

**A: One. They're very efficient and not very funny.**

**c**

**Q: How many feminists does it take to change a lightbulb?**

**A: Only one, but the light bulb has to really *want* to change.**

**d**

**Q: How many psychiatrists does it take to change a lightbulb?**

**A: I don't know, I left after the first hour and a half.**

**e**

**c**

**Q: How many Germans does it take to change a lightbulb?**

**A: That's not funny!**

**f**

**Q: How many politicians does it take to change a lightbulb?**

**A: Two. One to hold the giraffe and the other to fill the bathtub with brightly colored machine tools.**

**g**

**Q: How many birds does it take to change a lightbulb?**

**A: None. That's a hardware problem.**

**h**

**Q: How many performance artists does it take to change a lightbulb?**

**A: Two. One to make sure everything possible is being done while the other screws the light bulb into the faucet.**

**i**

# Match the steps and instructions. Then, put them in order.

let it cool

screw in  
new bulb

Make sure the power is shut off. The safest way to do this is to switch the large red button to "off" in the fuse box.

a

Allow the bulb to cool down before touching it. It's easy to burn yourself on an old bulb.

b

turn off  
the power

helpful  
hints

Ensure you can safely reach the bulb by using the right equipment. Don't stand on furniture!

c

Take the bulb out of the socket by twisting it counter-clockwise until it comes out of the socket.

d

climb a  
ladder

dispose of  
the bulb

To do so, insert a new bulb lightly but firmly into the socket and twist clockwise until it won't go any further.

e

Throw away the old bulb safely because the glass is fragile and very sharp. To do so, put the old bulb into the packaging of the new bulb for safe disposal.

f

restore  
power

remove  
the bulb

Once the bulb is installed, turn the power back on by switching the large red button to "on" in the fuse box

g

\*Check the wattage on the used bulb and replace it with a bulb of the same wattage.

\*Dispose of the bulb well out of reach of children.

\*Don't put your fingers in the exposed light socket.

h

# Match the tools

- a) tool box
- b) tape measure
- c) hammer
- d) pliers
- e) hacksaw
- f) needle nose pliers
- g) power drill
- h) hex keys
- i) stepladder
- j) wrench
- k) box cutter
- l) screwdriver
