Food waste problems and solutions

We are a **zero waste** household.

The solution is simple. We should buy only **local produce**.

I feel guilty when I eat food that isn't **grown locally**.

This is the **price to pay** for our comfortable modern-day lifestyle

It's a **modern miracle** that we can transport food such long distances.

I can't believe we are **destroying our planet** just to have bananas!

Restaurants and supermarkets are the worst **food wasters**.

Don't drag me into it. If you want to save the planet, you can stop eating bananas by yourself.

First recycling and now this? Maybe it's just impossible to be **eco-friendly**.

New technologies will solve this problem in the future.

Food waste should be a **punishable offense**.

At my house, we throw away enough food to feed a **third-world country**.
